

Buying a Freestyle

The Freestyle has a range of applications - first time owners, budget conscious owners - and it is the world's best-selling contemporary hovercraft. Ideal for use as a recreational hovercraft, for driving events businesses, coastal exploration and intertidal transport, The Freestyle provides access to areas no other vehicle can reach.

Fishermen, wildfowlers, island homeowners and thrill seekers all appreciate its flexibility, economy, low noise levels and exhilarating performance.

At home on coastal estuaries, mudflats, frozen lakes, rivers and sheltered waters, The Freestyle is remarkably seaworthy for a vessel of its size. It's made several channel crossings and completed thousands and thousands of miles of coastal and river cruises, won championships in coastal racing and found a home in over 25 countries from the heat of the Libyan desert to the frozen rivers of Scandinavia.

The Freestyle is 3.2m x 1.85m x 1.4m, all metal components are stainless steel or alloy and the build quality is second to none. We have never cut corners on The Freestyle although in many circles it is regarded as "the budget model". The finish of our GRP is to a high standard and electrical wiring and upholstery are all marine quality.

Amongst its many features it boasts a top speed of approx. 35MPH/56KMH/30Knots, a load capacity of approx. 200kgs, fuel economy of 6-8 litres per hour and low noise levels around 76dbA/25m cruising speed.

Freestyle: 365,000 EGP - No frills, all thrills hovering!
